***Reasons for Allowance***

The following is an examiner's statement of reasons for allowance: Applicants' arguments, filed 9/10/04, were found convincing to overcome the 35 USC 103(a) rejection issued in the Office Action dated 8/25/04. Additionally, applicants' process for producing purified 1,3-propanediol is unobvious over the prior art of record. Although the closest prior art of record (Sunkara et al. WO 00/10953 and US Pat. 6,235,948 B1) teaches the removal of colored impurities from a crude 1,3-propanediol mixture, comprising drying the 1,3-propanediol (removing water) before contacting the crude 1,3-propanediol with a solid heterogeneous acid catalyst (e.g., acid ion exchange resins, acid zeolites, etc.), the prior art of record does not teach or suggest contacting crude 1,3-propanediol, which comprises a MW 132 cyclic acetal, inter-alia, with an acid catalyst prior to drying the crude 1,3-propanediol mixture and/or the prior art of record does not teach or suggest converting a MW 132 cyclic acetal to more volatile materials by contacting an acid catalyst with a crude 1,3-propanediol mixture comprising a MW 132 cyclic acetal followed by separation steps (e.g., distillation or gas stripping) so as to remove a more volatile component (derived from the conversion of the MW 132 cyclic acetal) from the 1,3-propanediol. Such a modification would not have been obvious to one having ordinary skill in the art because one having ordinary skill in the art would not have surmised that the MW 132 cyclic acetal is converted to more volatile materials which are subsequently separated from the crude 1,3-propanediol via distillation, considering that the closest prior art of record teaches that the 1,3-propanediol is distilled from less volatile impurities (less volatile impurities remained in the distillation

flask) and makes no mention of a more volatile impurity that is separated from the 1,3-propanediol. All claims (1-12) are allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
